PROFESSIONAL SUMMARY

Self-taught Agentic AI Developer and Python Engineer who has shipped production-ready AI systems before completing secondary school. Specializes in building intelligent, multi-agent workflows using OpenAI Agents SDK, LangChain, and RAG architectures. Demonstrates rare ability to bridge complex AI engineering concepts with practical application development — delivering systems with persistent memory, semantic search, and real-time tool use. Actively expanding expertise in FastAPI backend development, Django, and cloud-native AI deployment.

TECHNICAL SKILLS

Languages	Python · HTML · CSS
AI / Agentic	OpenAI Agents SDK · Agentic AI · Multi-Agent Systems · Prompt Engineering
LLM Frameworks	LangChain · RAG · Vector Databases · Agent Orchestration
Backend	FastAPI · REST APIs · API Integration · Authentication Systems
ML & Data Science	Scikit-Learn · Pandas · NumPy · Matplotlib · Seaborn · EDA
Databases	Pinecone Vector DB · Vector Search
Automation	Beautiful Soup · Web Scraping · Browser Automation · Workflow Automation
Tools	Git · GitHub · VS Code · Jupyter Notebook

FEATURED PROJECTS

Multi-Agent AI Blog Generation System | [Python](#) · [OpenAI Agents SDK](#) · [Multi-Agent Architecture](#)

- Architected a 4-agent pipeline (trend discovery → topic selection → SEO content generation → QA review), reducing manual blog production time to near-zero.
- Implemented agent handoff and state management using OpenAI Agents SDK, enabling autonomous end-to-end content workflows.
- Demonstrated production-quality multi-agent orchestration patterns applicable to enterprise AI automation use cases.

RAG System with Semantic Search | [Python](#) · [LangChain](#) · [Pinecone](#) · [Gemini API](#)

- Built a complete Retrieval-Augmented Generation pipeline integrating LangChain, Pinecone vector DB, and Gemini API for context-aware AI responses.
- Implemented semantic chunking, embedding generation, and vector similarity search over custom knowledge bases.
- Delivered accurate, grounded AI answers by combining retrieval precision with LLM generative capabilities.

AI Chatbot with Memory, Auth & Web Search | [Python](#) · [LangChain](#) · [Pinecone](#) · [Gemini API](#) · [Google Auth](#)

- Engineered a full-featured AI chatbot with persistent chat history, Google OAuth authentication, and real-time web search integration.
- Leveraged Pinecone for long-term memory storage, enabling context continuity across sessions.
- Delivered a production-ready architecture covering auth, memory, retrieval, and live data — mirroring enterprise AI assistant design.

Advanced Thumbnail Scraper — Full-Stack Desktop App | [Python](#) · [Desktop App Dev](#) · [Full-Stack Architecture](#)

- Developed a full-stack desktop application for bulk YouTube thumbnail extraction and management.
- Implemented automated scraping pipeline with error handling, bulk processing, and a polished desktop UI.
- Open-sourced on GitHub: github.com/MYounus-Codes/thumbnails-scraper-advance-full-stack-desktop-app

AI-Powered Portfolio Website | [Python](#) · [HTML](#) · [CSS](#) · [AI Tools](#)

- Designed and deployed a responsive, AI-branded personal portfolio showcasing projects, skills, and technical capabilities.
- Integrated modern UI/UX practices with professional branding to attract recruiter and client attention.

EDUCATION

Aga Khan University Examination Board (AKU-EB)

Higher Secondary Education (Class 11) · Karachi, Pakistan

Expected Graduation: 2030

**Distinction: Built and deployed multiple AI-powered systems while enrolled full-time in secondary school.*

EXPERIENCE

Independent AI Developer

2024 – Present

- ▶ Shipped 5+ AI-powered projects — including multi-agent systems, RAG pipelines, and full-stack apps — entirely self-directed.
- ▶ Published open-source work on GitHub, demonstrating code quality and collaboration practices expected of professional engineers.
- ▶ Continuously advancing skills in FastAPI backend development, Django, and production-grade AI deployment.

ACHIEVEMENTS & HIGHLIGHTS

- ▶ Delivered production-quality agentic AI applications at age 16 — placing in the top tier of early-career AI engineers globally.
- ▶ Independently mastered OpenAI Agents SDK, LangChain, RAG architectures, and vector databases through project-driven learning.
- ▶ Built and deployed 5+ projects with real-world architecture: authentication, memory, semantic search, and API integration.
- ▶ Active open-source contributor — all projects publicly accessible on GitHub with professional documentation.
